

One Step Anti-TP (Treponema Pallidum) Test (Strip)

Sample

serum, plasma

Intended Use

The One Step Anti-TP (Treponema Pallidum) is a rapid double antigen sandwich immunoassay for the qualitative detection of antibodies to Treponema Pallidum in human serum/plasma. The test is for a visual, qualitative result and is intended for health care professional use as an aid in the clinical assessment of syphilis infection.

Storage

The test kit can be stored at temperature 4°C to 30°C in the sealed pouch to the date of expiration. The test kits should be kept away from direct sunlight, moisture and heat.
